

TIES® Mobile: **Mobile access to mission-critical information for situational awareness, safety and risk management—wherever you are.**

As part of the TIES service, TIES Mobile displays real-time safety, security and risk management data, consolidated by TIES from many sources, directly to a mobile device. Engineered specifically for ease of use, TIES Mobile provides secure, locationally aware two-way alerting—wherever you are.

Using TIES Mobile, you can—

- Receive secure, targeted and filtered alerts
- Notify approved TIES members of your location in real time
- Create alerts in the field with text, pictures, video/audio and location, then upload and share with approved TIES members

Examples of TIES Mobile showing information aggregated from multiple sources on a map (above), and in an alert grid (below)

TIES Mobile Technology Profile

- A secure mobile notification and alerting platform
 - Integrated with TIES Web
 - Windows Mobile 5/6 application or mobile browser
 - Integrated, intuitive mapping
